Provenance : Found in the Simon Fairfield Public Library Archival Cabinet in 2016. No further accession information is available.

Processing Information : This collection was processed by RLD Lavallee on May 4, 2016.

MARC Access :

Administrative History

The Douglas Planning Board is an elected board of 7 individuals. The primary duty of the planning board is to handle the planning, construction or completion of subdivisions. The goal is to ensure that the subdivisions built in Douglas meet the standards set forth in the regulations.

The board also acts as a special permit granting authority and holds public hearings and approves special permits. The aim is to strike a fair and reasonable balance between the special character of the town and the ability for the townspeople to have use of their own property in a way that is beneficial to the property owner.

The board is involved in zoning changes. A public hearing is held before the changes can be presented at a town meeting, allowing citizens an opportunity to give their opinions and observations on how the proposed bylaws may affect the use of personal property. The board also has the responsibility of issuing Special Permits in accordance with the State Zoning Act (MGL Ch.40A) for projects requiring such as defined in the Town Zoning Bylaws.

The board is also responsible for reviewing and approving the subdivision of lands.

Generally speaking, the role of the Planning Board is to guide the growth and development of the Town of Douglas by issuing permits to applicants that have projects that are consistent with Federal, State and Local laws, bylaws and regulations. At the same, it is imperative that the Public Health, Safety and general welfare for the residents of Douglas is maintained.

The Zoning Board of Appeals : has three duties in Douglas:

1. Hear appeals taken from decisions of any administrative official or board of the Town acting under the provisions of the Law
2. Grant variances from terms of the zoning Bylaw
3. Grant special permits as provided by the Zoning Bylaw and Review Comprehensive Permit Applications

A Master Plan's primary purpose is to present the most current picture of a community and determine what direction the community is to take for the future. Master Plans include "...assessments of existing resources and issues, projections of future conditions and needs and consideration of goals and desires." The Master Plan provides a framework that is used when making decisions regarding future land use and the physical development of a community. The Master Plan takes into consideration the importance of a community's natural resources, as well as the social and economic values.¹

A Corridor Study is used to identify existing travel demands and determine the best way to serve those existing demands as well as any future demands that may arise. The study is usually initiated to respond to a specific problem, although it often deals with an area as a whole, by identifying existing and future deficiencies and evaluate alternative solutions. These solutions usually involve facility descriptions including environmental, operational and other impacts to the area.²

¹ Defining a Master Plan is based on the Town of Webster's "What is a Master Plan?" Town of Webster. *Town Of Webster, Comprehensive Master Plan 2013*. 2015.
